EXPERIENCE

SOFTWARE DEVELOPER (2022 - 2024)

Integrity Support, Inc. - *Nashville, Tennessee (Remote)*

- Developed enhancements for customer-facing sites in a blended MVC/MVVM .NET Pattern EHR application, utilizing C#, Classic ASP, and Javascript.
- Designed a customer/client-facing portal website with integrated chat and signature capturing components.
- Implemented efficient SQL table structures, optimizing storage through custom array utilization with JSON and jQuery.
- Deployed and tested releases using Azure CI/CD tools on Cloud Services, utilizing Microsoft IIS sites on a cloud Windows Server.
- Utilized Microsoft SQL Server to create and optimize Stored Procedures, Views, and Scripts for various tasks related to customer data.

TUTOR (2022 - 2024)

2U / edX - Lanham, Maryland *(Remote)*

- Educated over 100 students worldwide on full-stack web development fundamentals, covering HTML, CSS, and Javascript.
- Instructed students on building client-side applications using third-party APIs through Fetch Calls and creating RESTful APIs.
- Guided students in working with both MySQL and NoSQL databases, leveraging back-end Node JS technologies such as Sequelize and Mongoose.
- Taught the implementation of React for development of MERN stack single-page applications (MongoDB, Express JS, React JS, Node JS).

INSURANCE SALES ASSOCIATE (2020 - 2021)

Banker's Life & Casualty- *New Bern, North Carolina*

- Scheduled and conducted appointments with prospective clients, addressing their health and retirement needs.
- Provided comprehensive customer support by addressing inquiries related to health insurance, convalescent care, life insurance, and financial planning.
- Conducted interviews with potential clients, gathering information to align their profiles with the most current and suitable coverage options.

CHIEF FINANCIAL OFFICER (2017-2019)

Lotus Experience on Demand- *Greenville, North Carolina*

- Facilitated the logistics and promotion of events, managing audiences averaging 150+.
- Produced engaging visual content, including videos, photos, and event flyers, leading content creator teams during live events.
- Managed an executive staff of 10 employees and collaborated with independent contractors and affiliates, reaching a network of 50+.
- Negotiated with business owners to plan events and implement growth strategies.

PROJECTS

FEEDIT! - DON'T LET YOUR CRAVINGS STOP YOU

Collaborators: Jacob Nordan, Justin Liao, Tristan Ebron

I designed the user interface for an application that processes user input and delivers curated food and drink recipes using two APIs. I created HTML and CSS components, and integrated fetch requests with JavaScript.

APPLITRAK - KEEP UP WITH YOUR JOB APPLICATIONS

Collaborators: Brad Rollinson, Lauren Goss, Aubri Heneley

I led the development of an application designed to empower users in effectively managing their job application process. This application uses Express.JS and Handlebars, with MySQL to store and retrieve user data. My key contributions centered around the implementation of HTML, CSS, and Handlebars to connect with MySQl using Sequelize.

SHOE FANATIC - SNEAKER SELLING CRM

Collaborators: Jacob Nordan & Tristan Ebron

I played a pivotal role in the front-end and back end development of a React-based application. This project uses React tools, including Redux for state management, and integrates Stripe to establish a storefront for selling sneakers using Express and Mongoose.
